ROSHAN NIHAAL JAHANGEER
Software Engineer | Full Stack Developer
Chennai, India | +91 9385701517 | roshan.nihaal18@gmail.com | @linkedin | @github | @portfolio

PROFESSIONAL SUMMARY

Full stack developer with 3 years of experience designing, implementing, and deploying scalable web applications using Angular, Node.js, and various database technologies. Proven track record of increasing application performance by 30% and reducing deployment times by 40%. Adept at collaborating within Agile teams and autonomously delivering impactful outcomes.

TECHNICAL SKILLS

Frontend: Angular, PrimeNG, Tailwind, SCSS
Backend: Node.js, Express.js, Supabase, RabbitMQ
Devops & Services: Docker, Nginx
Databases & Analytics: PostgreSQL, MongoDB, MySQL, Redis, DuckDB
Languages: TypeScript, JavaScript, SQL, Python

PROFESSIONAL EXPERIENCE

Software Engineer | *Viewzen Labs Pvt. Ltd.* *Feb 2026 - Present*

- Designed and customized an Apache Superset implementation to replace existing proprietary BI tool, reducing the annual licensing costs.
- Significantly improved dashboard performance and query response times by introducing DuckDB as an analytical layer for large datasets.
- Implemented key enterprise security and architectural features including RBAC, Multi-Tenancy, and API Key-based authentication in Apache Superset.
- Completed full system customization, integration, and live production deployment within 6 months, successfully meeting the strict target Go-Live timeline.
- Configured production Linux servers from the ground up, installing core dependencies, initializing databases, and deploying the application stack.

Software Engineer | *Viewzen Labs Pvt. Ltd.* *Jul 2022 - Sep 2024*

- Designed and developed multiple microservices utilizing Node.js, MongoDB, PostgreSQL, and Docker, ensuring scalability, reliability, and efficient deployment.
- Developed RESTful APIs, improving performance by 30% and supporting a global user base of over 1 million.
- Played a key role in designing database models, contributing significantly to their development and optimization.
- Leveraged a stack comprising Node.js, PostgreSQL, Kafka, Docker, and Angular to achieve seamless data processing and visualization.
- Executed numerous data migrations across various environments.

EDUCATION

Madras Institute of Technology *2018 - 2022*
Bachelor of Technology in Information Technology

PROJECTS

OTP Authentication System | *Angular, Node JS, Redis*

- Developed an OTP authentication system leveraging Angular, Node JS and Redis.
- Utilized TOTP (Time-based One-Time Password) and HOTP (HMAC-based One-Time Password) methods.
- The app securely generates and verifies one-time passwords, providing a dedicated and efficient solution for user authentication.
